

What To Expect on Your First Visit to Palmetto Clinic

You've already talked to one of our doctors, so we've already determined the nature of your problem. We also know that our chiropractic-rehabilitation program is a good match, so now you're here to start the road to wellness.

After you've checked in at the front and filled out all the paperwork, it's time for a complete examination. Your chiropractic examination may include the following (all or in part):

- Computerized range of motion testing
- Computerized muscle testing
- X-rays to assess your skeletal system
- Foot scans/evaluation
- Spirometer testing (vital lung capacity test; spinal health & vital lung capacity go hand-in-hand)
- Blood pressure testing
- Orthopedic testing
- Posture evaluation
- Nutritional/biomeridian assessment

Examination fee schedule: \$75 up to a maximum of \$215 (costs depend on your needs and depth of examination and will reflect our payment at time of service discount)

Once your examination is complete, treatment and healing can begin. Your first day may or may not include treatment. Once you begin coming for adjustments and/or therapy, you can expect to see many positive changes very quickly.

Treatment fee schedule: \$20 up to a maximum of \$61 per treatment. (payment at time of service discount applies)
